

• IBM HACKATHON PROJECT

AI Career Copilot

Your personal job-readiness assistant

Track skills. Find gaps. Prepare with confidence.

Problem Statement

01

Students and early-career professionals struggle to judge whether they are job-ready

03

Career preparation is fragmented across resumes, courses, job descriptions, and interview practice

02

Skill gaps are often discovered only after an application is rejected

04

Generic advice does not adapt to a person's profile, target role, or current skills

Readiness is personal.
Preparation should be too.

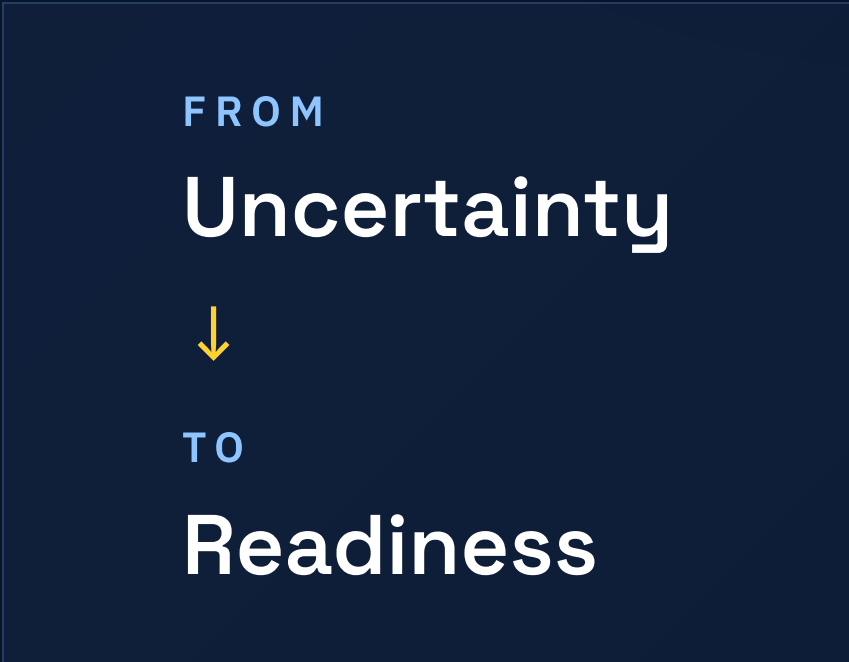

Solution Statement

**AI Career Copilot
turns career
preparation into one
guided workflow**

Users create a profile with education, target role, and current skills

Personalized interview preparation helps users practice with a clear next step

The platform analyzes readiness and highlights areas for improvement

- A single place to understand, improve, and prepare

How It Works

01

Build a personal career profile

02

Select a target job role and add current skills

03

Review career analysis and identify gaps

04

Check a job-readiness score

05

Prepare for interviews with focused guidance

The profile screen sets the context that makes every later insight more relevant.

Core Product Capabilities

 01 / MY PROFILE

capture the candidate's background and goals

 03 / JOB READINESS SCORE

create a clear progress signal

 05 / UNIFIED NAVIGATION

keep the entire journey in one workspace

 02 / CAREER ANALYSIS

turn profile information into actionable insights

 04 / INTERVIEW PREP

focus preparation on the selected role

-
- Designed around the candidate's next decision.

Product Walkthrough

From a focused profile to focused preparation.

AI Career Copilot

Your personal job-readiness assistant — track skills, analyse gaps, and prepare for interviews.

My Profile

Fill in your details and save. All fields marked * are required.

Full Name *

Education Details

e.g. BSc Computer Science, 2023

Target Job Role *

Python Developer

Current Skills (comma-separated) *

e.g. Python, Git, SQL

Why It Matters

Career readiness
becomes easier to
understand at a glance.

- 01 Replaces scattered preparation with a single, structured experience
 - 02 Helps users move from uncertainty to an actionable plan
 - 03 Supports more confident, targeted interview preparation
 - 04 Creates a foundation for continuous skill growth
- 

Closing: From Profile to Prepared

AI Career Copilot helps every candidate understand where they stand, what to improve, and how to prepare next.

- Built for the IBM Hackathon
